

Certificate of Attendance

Summer School: Differential-Geometric and Topological Methods in Modern Physics

This is to certify that

Marco Díaz Maceda

attended the Summer School “Differential-Geometric and Topological Methods in Modern Physics” held at the Banach Center, Będlewo, Poland, from 19 July to 28 July 2026 and presented a talk

“Multisymplectic manifolds with boundaries: A field-theoretic approach”.

The Summer School brought together graduate students, PhD students and early-career researchers for a program of advanced lecture courses and research seminars devoted to contemporary developments in differential geometry, topology, and their applications to modern theoretical and mathematical physics.

Issued in Będlewo, Poland, on 28 July 2026.

On behalf of the Organizing Committee

Katarzyna Grabowska
