

CUNEF
UNIVERSIDAD

Madrid, June 18, 2026

To whom it may concern,

This is to certify that **Marco D. Maceda** delivered the Geometrical Mathematical Physics Research Group Seminar on Friday, October 24, 2025 at CUNEF Universidad, Madrid (Spain). The seminar, entitled

Kanatchikov's quantization: problems and perspectives,

lasted an hour and it sparked a vibrant discussion afterwards. We thank Marco for his excellent seminar.

The Geometrical Mathematical Physics Research Group Seminar is an international seminar series held regularly in Madrid (Spain) since 2025. The seminars cover topics in both mathematics and physics, including but not limited to quantum mechanics, stochastic processes, quantum phases of matter, quantum information, geometric mechanics, geometric field theory and differential geometry.

- For a full list of past group seminars, visit:
<https://sites.google.com/view/geommpphys/research/group-seminar>.
- To follow the seminars and receive the announcements, subscribe by sending an email to geom.mphys@gmail.com.

Please do not hesitate to reach out if you require additional information.

Yours faithfully,

David Trillo
